Pitt to Open $6.1 Million Nanofabrication Facility

By Karen Hoffmann

Pitt will unveil its new $6.1 million NanoScale Fabrication and Characterization Facility at a dedication ceremony at 4:30 p.m. Sept. 29 in the foyer of Benedum Hall.

Following the dedication, tours will be available of the 4,000-square-foot facility, which serves the University’s Gertrude E. and John M. Petersen Institute for NanoScience and Engineering.

In the last three years, three start-up companies and one major corporation have licensed nanotechnology developed by researchers at Pitt, which recently was ranked second in the nation in nano- and microscale research by Small Times. Since spring 2005, Pitt has hired 13 new nanoscience faculty members, bringing the total number of faculty affiliated with the institute to 48.

The dedication will be preceded by a luncheon featuring speaker Mihail Roco, National Science Foundation senior advisor for nanotechnology, and a symposium titled “Frontiers in Nanoscience,” during which researchers from the U.S. Department of Energy National Renewable Energy Laboratory (NREL), Columbia University, and Pitt will discuss their latest discoveries.

In February of this year, the University received a $5 million gift from alumnus John M. Petersen and his wife, Gertrude, to create an endowment supporting research in nanoscale science and technology. John Petersen, the retired president and chief executive officer of the Erie Insurance Group in Erie, Pa., earned the Bachelor of Business Administration degree at Pitt in 1951. The Petersens have maintained a strong relationship with the University through their support of a variety of University programs, including their $10 million gift to name Pitt’s John M. and Gertrude E. Petersen Events Center, home of what is considered the nation’s premier on-campus basketball arena.

Both avid fans of Pitt athletics, the Petersens continued their longstanding support of the Department of Athletics with a gift of $600,000 to support baseball and swimming scholarships.

Work by Petersen Institute researchers already has resulted in the development of color-shifting paints, a contact lens-embedded sensor with the potential for noninvasive glucose-level monitoring for diabetes, and scaffolding to heal damaged hearts.

The new facility will promote multidisciplinary research, scholarship, and education among Pitt’s School of Engineering, School of Arts and Sciences, and Schools of the Health Sciences. Key technologies available in the facility include a transmission electron microscope, an electron-beam lithography system, and a modular X-ray diffraction system.

A full schedule of the Sept. 29 events follows.

11:30 a.m. Luncheon featuring speaker Mihail Roco, Senior Advisor for Nanotechnology, National Science Foundation, Connolly Ballroom, Alumni Hall

Roco will assess the research frontiers and applications of nanotechnology in an international context. He will address the implications of a National Nanotechnology Initiative (NNI) report, delivered Thursday, Sept. 21, to Congress, titled “Environmental, Health, and Safety Research Needs for Engineered Nanoscale Materials.”

See NANOFABRICATION FACILITY, page 7
Early Childhood Reading, and Spellings

U.S. Secretary of Education Margaret Spellings read to young patients during a Sept. 14 visit to the UPMC St. Margaret Lawrenceville Family Health Center, spotlighting the importance of early reading to children. Among those who greeted Spellings was Jeannette South-Paul (pictured with Spellings at right), chair of the Pitt School of Medicine’s family medicine department.

The Lawrenceville facility is one of five UPMC Family Health Centers that participate in Reach Out and Read, a nationwide early childhood literacy program. Doctors and nurses at the five UPMC sites distribute more than 2,500 books each year to children during health checkups and advise parents about the importance of reading aloud to their children. Studies of childhood literacy show that parents who receive books and literacy counseling from their children’s doctors and nurses are more likely to read to their young children, leading to better language development.

Pitt Arts Will Sponsor “Pitt Nights” This Fall

The University’s Pitt Arts program will sponsor three Pitt Nights for students, faculty, staff, and guests this fall. Each Pitt Night will include admission to an arts performance plus free transportation, deserts, and meetings with artists—all for a couple of dollars more than the price of a Pitt Arts Cheep Seats discounted ticket. The first Pitt Night will be at the Pittsburgh Symphony Orchestra’s Sept. 29 concert beginning at 8 p.m. in Heinz Hall, 600 Penn Ave. It will feature performances of Kodaly’s Suite from “Hary Janos,” Prokofiev’s “Violin Concerto No. 1,” and Rimsky-Korsakov’s “Schererezade” conducted by Yan Pascal Tortelier and featuring violin soloist Leila Josefowicz. Pitt Night ticket prices start at $17, and the event will include a dessert reception with Pittsburgh Symphony musicians.

The Pittsburgh Opera’s Oct. 20 performance of Leoncavallo’s “Pagliacci” will be the second Pitt Night, with tickets for the 8 p.m. performance priced at $18. Pitt Night participants will get to meet cast members following the performance, which will be held in the Benedum Center, 719 Liberty Ave.

The third Pitt Night will be at the Pittsburgh Ballet Theatre’s performance with full orchestra of Tchaikovsky’s “Swan Lake” at 8 p.m. Oct. 27 in the Benedum Center. The $17 ticket price will include admission to a pre-show soiree with Pittsburgh Ballet Theatre staff members. Tickets can be purchased at Pitt Arts in 929 William Pitt Union. For more information, call 412-624-4498.

University to Host Criminal Justice, Equality Discussion

Charles J. Ogletree Jr., Jesse Climenko Professor of Law and director of the Charles Hamilton Houston Institute for Race and Justice at Harvard University Law School, and Derrick Bell, Pitt law alumnus and Distinguished Visiting Professor of Law at Pitt and visiting professor of law at New York University School of Law, will participate in a discussion titled “150 Years After Dred Scott: Is the Most Criticized Case in American History Still Relevant?” at noon Sept. 27 in Room 111 of the Barco Law Building.

Ogletree earned the Bachelor and Master of Arts degrees in political science at Stanford University in 1974 and 1975, respectively, and received his law degree in 1978 from Harvard University. Named professor of law in 1993, Ogletree has served as director of Harvard’s Criminal Justice Institute and as both faculty director and associate dean of clinical programs at Harvard.

Bell received his law degree from Pitt’s School of Law in 1957, after having earned his undergraduate degree at Duquesne University in 1952. Former litigator with the NAACP Legal Defense Fund from 1960 to 1965, Bell is said to have worked in every aspect of civil rights, appointed to the Harvard University Law School faculty in 1969, Bell left Harvard in 1981 to serve as dean at the University of Oregon School of Law. He returned to Harvard in 1986, but left again in 1992 to pursue his current position as a visiting full-time professor of law at the New York University School of Law.

Pitt Arts May Host Fall Opera, Ballet

The Pittsburgh Opera will present the world premiere of “The Great Gatsby” at the Benedum Center on Nov. 3 and 4, followed by a showing at the Benedum Center on Nov. 8. The company will then present the world premiere of “Don Giovanni” on Nov. 16 and 17, followed by a showing on Nov. 20.

In addition to the opera, the Pittsburgh Ballet Theatre will present “Cinderella” on Dec. 20 and 21, followed by a showing on Dec. 22. The company will then present the world premiere of “The Tempest” on Jan. 17 and 18, followed by a showing on Jan. 19.
Safeguarding Our Institutional Treasure

This is the printed version of the report delivered by Chancellor Mark A. Nordenberg at the June 23, 2006, Annual Meeting of the University of Pittsburgh Board of Trustees.

Good morning, everyone. As always, it is great to be with you, and I want to begin by thanking you for all that you have done, and continue to do, to help advance the University of Pittsburgh, on so many fronts and in so many different ways.

Just a few weeks ago, I purchased a recently published history of the Whiskey Rebellion, a key event in the political development of our country and also in the life of this region. When I randomly opened that volume, the first thing I saw was a reference to Modern Chivalry, a book written by our University’s founder, Hugh Henry Brackenridge, and a book widely regarded to be the first American novel. I turned to the index and quickly concluded from the number of listings next to his name that Mr. Brackenridge, in addition to everything else he had done, must have played a significant role in this event. That should not have surprised me, because he was one of the leading citizens of the region, but I had not known about this particular part of his life, and reading about it was interesting. Thinking that some of you may be similarly interested in the Whiskey Rebellion and in our founder, we have placed copies of the book around the table with your Board materials.

I raise this now because reading that volume also added some perspective to my thinking about this annual meeting. Most of us almost view the Whiskey Rebellion as “ancient” American history, and the 1790s were a long time ago. However, to put that in more directly relevant context, our founder was dragged into the middle of that fray several years after he secured passage of the legislation chartering the academy that would become our University. Next February, in fact, we will celebrate Pitt’s 220th birthday.

For understandable reasons, because this is a complex place, we frequently think of our stewardship responsibilities in more complicated terms. But at the heart of the matter, we have been entrusted with an institutional treasure—a University whose life spans two complete centuries and parts of two others; a University that has provided exceptional educational opportunities to hundreds of thousands of students over the course of its proud history; a University that has claimed a place as an internationally respected center of pioneering research; and a University whose activities sit near the heart of the collective hopes of its home communities. Our mission is to safeguard that treasure and add to its quality, strength, and impact.

Extraordinary Progress

Fueled by a determined effort from the entire University community—committed faculty and staff, hardworking students, loyal alumni, and devoted friends, as well as Trustees—that job is getting done. We see our progress in the trend lines charting changes in our own performance over time—-with far higher numbers of applicants seeking admission, with better-qualified students enrolling, and with dramatically elevated levels of research support, just to give three key examples.

We also see progress in the positions we now occupy in the comparative rankings developed by others.

• As recently as 1997, we were not even listed among the top public national universities in the U.S. News & World Report annual ranking. In 1998, we debuted at 48. Last year, we rose to 19th—a clear sign of momentum, even if we do not fully embrace the weighting of factors in this particular assessment.

• In The Top American Research Universities, a report issued annually by

See page 4
In terms of student achievement, we added to last fall’s Rhodes Scholarship win with great springtime news. Margaret Bennewitz and Tanya Keenan won Harry M. Goldwater Scholarships, Adam Iddriss won a Harry S. Truman Scholarship, and Clayton Magill won a Winston Churchill Foundation Scholarship. Year after year, our University Honors College students successfully compete with the top students from the very best colleges and universities in the country.
In terms of federal student aid, the news is equally sobering. Here the Chronicle reported that, last December, Congress cut $12.7 billion from government-backed student loan programs “to help slow the growth of federal spending over the next five years.” The Chronicle went on to state that “[t]he cuts, which are the largest in the loan programs’ histories, account for one-third of a $40-billion deficit-reduction package that lawmakers in both chambers approved just days before...the holidays. To achieve those savings, the bill would slash government subsidies to private lenders, raise interest rates for students and parents, and require borrowers to pay a 1-percent fee to agencies that guarantee loans.” Proposed budget reductions for fiscal year 2007 would cut an additional $3.5 billion from the budget of the U.S. Department of Education, eliminating several student-aid and college-preparation programs. These cuts, on both fronts, have a magnified impact on Pitt. Because we are so strong in biomedical research, cuts to the NIH budget have a disproportionate effect on us. And because we continue to enroll large numbers of students of modest means, cuts to federal financial aid programs also have a disproportionate impact on Pitt and on the families we serve.

Just last month, the Chronicle of Higher Education published a special report entitled “Elite Colleges Lag in Serving the Needly: The Institutions with the Most Money Do a Poor Job of Reaching the Students with the Least.” The study used the percentage of a university’s student body eligible for Pell Grants—which are limited to families with annual incomes of less than $40,000—as its measure of accessibility. Pitt ranked seventh among the 22 public Association of American Universities institutions listed in this survey. And, to return to the real theme of the article, no private AUU university enrolled as high a percentage of Pell Grant-eligible students as Pitt did, and many of the private universities that are considered to be truly elite trailed very far behind.

As we make our way across this increasingly inhospitable fiscal landscape, one trend line in particular stands as a shining beacon of hope. This University has become markedly more effective in its fundraising.

In 1995, we attracted $39 million in total voluntary support. Last year, we attracted $103 million in total voluntary support, and we expect to reach $110 million this year, which would be an increase of 182 percent over 1995.

Our capital campaign continues to exceed our most optimistic expectations. We launched this campaign with a $500 million goal, when professional advisors were telling us that we were not positioned to launch any campaign. Despite that counsel, we moved ahead, achieved that first goal early, and doubled it to $1 billion. Today, I am very pleased to advise you that we have raised $960 million, that we also will reach the billion-dollar mark early, and that our momentum is still building.

This is a campaign that has benefited from the extraordinary generosity of donors capable of making very large gifts, attracting 193 donations of $1 million or more. It also is a campaign that has generated broad-based support, with gifts from more than 113,000 donors.

Included among those 113,000 donors are 67,000 alumni. The Pitt Alumni Association has been a dedicated partner in this campaign, just as it has been in so many of the other institutional initiatives that have helped propel our University forward. The generous outpouring of support from our graduates back to their alma mater has been one of the very heartening features of this campaign.

At the same time, if you do the math, you can see that this campaign also has been supported by more than 45,000 donors who are not Pitt alumni. To be able to attract support from such a large number of donors, not motivated by alumni loyalty but who believe in Pitt enough to invest in us, also is inspiring.

This is a campaign that has taken our fundraising efforts in critical new directions. First, when we launched this campaign, individual giving accounted for only 24 percent of the support we were attracting annually. In each of the last two years, individuals accounted for more than 41 percent of our support. We knew that attracting ever-higher levels of individual support would be critical to our success and have worked successfully to move the campaign in that direction.

In addition, gifts from outside the Pittsburgh region have accounted for more than 55 percent of our campaign total. We made outreach a priority and that, too, has worked. In fact, just as our research has become an engine for annually importing large sums of money into this region, so has our capital campaign.

Most important, though, this is a campaign that has made an enormous difference in Pitt’s quality, starting with our ability to attract, support, and retain some of the most talented and committed people in the world, and I include in that description faculty, staff, and students. To highlight some particularly telling examples, the campaign already has produced more than 350 new scholarships and fellowships and 66 new chairs and professorships—forms of support that are absolutely critical if we are going to compete with the country’s very best universities. Just in the last few weeks, we celebrated major gifts from Tom and Sandy Usher to endow a chair in melanoma research; from the legendary Arnold Palmer to endow a chair in cancer prevention; and from Monto Ho, one of our most distinguished faculty members, and his wife Carol to endow a chair in infectious diseases and microbiology.

This also is a campaign that has positioned us to initiate and sustain programs of quality and of impact. Let me, again, give a just a few telling examples. The multiple and extraordinarily generous gifts from John Swanson to create and advance the John A. Swanson Institute for Technical Excellence have created a platform for us to do things no other University can do in education, research, and economic development. The creation, by Henry and Elise Hillman, of the Hillman Fellows Program for Innovative Cancer Research provided early stage support for 23 novel, high-priority projects in this last year alone. The funding, by LaVonne and Glen Johnson, of the Johnson Institute for Responsible Leadership will help ensure that ethics and accountability remain visible and perpetual priorities in the programs of the Graduate School of Public and International Affairs. And the most recent gift from...
John and Gertrude Petersen, two of our most generous benefactors, will support University-wide initiatives in nanosciences—and we were very pleased when the global trade publication $ in a recent ranking recently ranked our microscale and nanoscale programs second in the country.

Obviously, this also is a campaign that has permitted us to construct and renovate facilities that support our aspirations. As I have said to some of you in the audience now is how we arrived at the best place in the country to do biomedical research and the best place in the country to watch a basketball game. And those two compelling examples are just the beginning of the story. In the past decade, we launched and completed more than $1 billion in facilities projects. That construction, renovation, and restoration—here in Oakland and across our other four campuses—have dramatically elevated the “Pitt environment” in the arts, in instruction, in research, in recreation, in student life, in campus living, and in virtually every other area in which the people of the University are engaged.

But as far as we have come, we all know that much more remains to be done in our never-ending quest to secure an adequate resource foundation. We know it from the general trend lines, already discussed, evidencing the fact that those continue to be days of declining public support for higher education. We know it when we are dreaming about, or planning for, an even better Pitt. Certainly, it is not uncommon to know that you've got to keep being a success. We understand that challenge—including the fact that past successes have brought with them both higher expectations and stiffer competition—and we welcome it. In fact, we realize that it is our shared good fortune to have reached a point where sustaining success is our pressing challenge.

In February of 2000, just a little more than six years ago, this Board publicly declared, “By aggressively supporting the advancement of Pitt's academic mission, we will clearly and consistently demonstrate that this is one of the finest and most productive universities in the world.” We already have traveled a fair distance on that never-ending journey. I look forward to our continuing efforts to support the people, develop the programs, and marshal the resources that will make us ever more successful in our pursuit of that noble goal.

Discover a World of Possibilities
Capital Campaign Extended

Following the chancellor's report, the University of Pittsburgh Board of Trustees passed a resolution authorizing the University to extend Pitt's Discover a World of Possibilities fundraising campaign—raising its goal from $1 billion to $2 billion.

WHEREAS, this campaign has added substantially to the academic strength and stature of the University by providing support for talented and deserving students, committed and high-achieving faculty members, programs of quality and impact, and facilities that are essential to the achievement of our institutional goals, and

WHEREAS, the University of Pittsburgh is faced with constrained governmental funding for student financial aid, research, facilities and must continue to attract private gifts and grants to support its important mission, and

WHEREAS, the Board of Trustees remains firmly committed to its statement of aspiration, publicly adopted in February of 2002: “By aggressively supporting the advancement of Pitt's academic mission, we will clearly and consistently demonstrate that this is one of the finest and most productive universities in the world,” now therefore resolve that all of the Board of Trustees do hereby authorize and dedicate themselves to act as the start of the capital campaign, with an increased goal of $2 Billion Dollars, to be used to support the people and programs of the University and Pitt in ways that further enhance its strength and quality, increase its impact, and add to its already proud legacy.
**Falk Pharmacy Will Offer Free Prescription-Delivery Service to Pitt Faculty, Staff Members**

By Bruce Steele

Beginning Oct. 2, Falk Pharmacy will offer a free prescription-delivery service to Pitt faculty and staff members enrolled in the UPMC Health Plan who work in the following campus buildings: Benedum Hall, Craig Hall, Hillman Library, Medical Arts Building, Posvar Hall, and Sennott Square.

In Craig Hall, prescriptions will be delivered to the first-floor reception area, where faculty and staff can pick them up after 1 p.m. on Wednesdays and Fridays.

In the other five buildings, prescriptions will be delivered to employees at their offices before 4:30 p.m. on Mondays and Thursdays. If customers don’t expect to be in their offices at scheduled delivery times, they must notify Falk Pharmacy staff in advance that they want their medication(s) left with other people in their department.

Prescription orders must be made by 5:30 p.m. for delivery the next business day.

Falk Pharmacy, located in the Falk Medical Building at 3601 Fifth Ave., will not accept cash payments for deliveries but will accept all major credit cards, including the “Benny Cards” issued to participants in Pitt’s flexible spending accounts plan.

To protect employees’ privacy, delivered prescriptions will not identify the specific contents.

Falk Pharmacy will deliver over-the-counter medications to employees in the same orders with their prescription drugs, but will not deliver over-the-counter medications alone.

The pharmacy will extend its free prescription-delivery service to more Pitt buildings in coming months, said John Kozar, director of benefits in the University’s Office of Human Resources.

Instructions on beginning the office-delivery process or transferring prescription deliveries from another pharmacy to Falk Pharmacy will be posted next week on the Pitt benefits Web site at www.hr.pitt.edu/benefits. The site also will include information on prescription discounts available through Falk Pharmacy.

The new prescription-delivery service is part of an upgrade of Falk Pharmacy, aimed at providing faster, friendlier service. A renovation of the pharmacy, scheduled to be completed by Jan. 1, will create larger and more attractive intake and pick-up windows with dividers to protect customer privacy.

After the renovations are completed, Falk Pharmacy will begin offering customers a free medication-counseling program—called the Medication Therapy Management Program—through a joint initiative with Pitt’s School of Pharmacy.
